

VAP is an all inclusive desktop SQL database which is designed to run on your desktop or notebook computer. This program is designed for one user and is not created for server systems. Future additions may allow for corporate licenses and server installations.

Our Pricing is as Follows:

One Desktop/Notebook Licence: \$6,000.00

Annual renewal fee: \$500.00

Updates are completed every time you open the program and are connected to the internet. Our goal is to provide quarterly updates and additional reports.

If you would like to request a report addition to VAP that is not currently available, you may send a sample of your report with a request to VAPrequest@vendorteamservices.com. We will review your request and determine if the report can be modified for the program and can be distributed to the entire customer base. In some cases there could be a charge to create your report.

We wish you the very best in your road to success with VAP.
